

Mevea Cargo Handling Equipment Training Packages

Mevea Cargo Handling Equipment Training Packages

(*remote operation available)

Mevea's Cargo Handling Equipment Training Packages are the most versatile and advanced simulation-based training solutions available in the market today. They help equipment operators to develop their skills, whether they are beginners or operators with many years of experience. Training Packages are based on advanced physics simulation and can be customized according to customer's equipment, operating environment and operating processes.

Mevea Simulator Platforms and Instructor Station

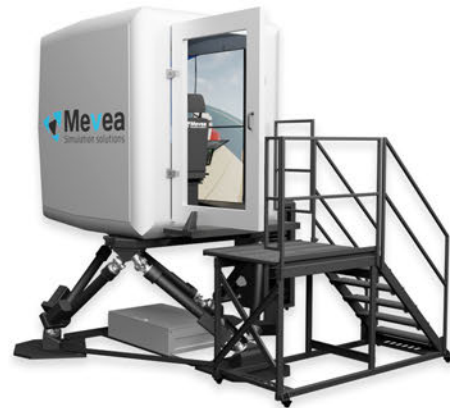

Simulator Platforms

Mevea Desktop

Mevea Pro

Mevea Master King

Mevea Remote Operation Station

All simulator platforms can have VR/MR visualization option

Instructor Station

All Mevea's Training Packages are supporting the Mevea Simulator Platforms ranging from desktop to a high end cabin solution placed on top of 6DOF (Degrees of Freedom) motion platform.

Remotely operated equipment can be used from Mevea Remote Operation Station. All simulator platforms support the highly immersive Virtual Reality (VR) / Mixed Reality (MR) visualization option.

The training sessions with Training Packages are managed by Mevea Training Software. It provides wide range of capabilities to configure training exercises, then conduct and follow the training session itself and finally analyze the trainee performance and identify areas of improvement. Mevea Training Software is operated from Mevea Instructor Station.
